HKBMONUBWED

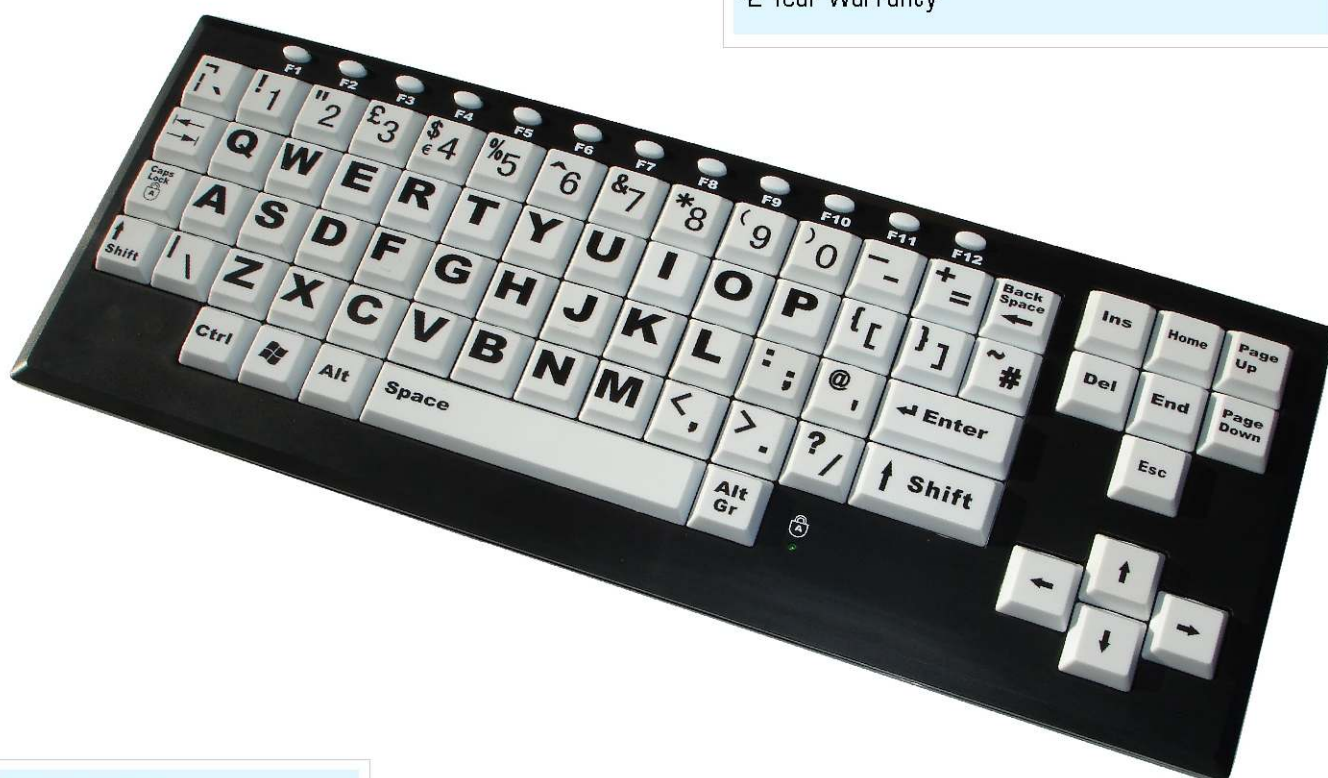

ABOUT

Keyboards with LARGE keys have a distinct advantage. The downside of these keyboards has often been the cost, which can exclude them from their intended market. The 'Key-Monster' keyboard solves this problem by bringing costs down whilst offering a range of options.

2 Port In-Built USB Hub on the side of the unit, great for extra USB accessories to be easily plugged in. The Key-Monster keyboard is immensely strong due to the solid metal mounting plate. Utilising individual 'positive click' key switches ensures good feedback. The 'no-wobble' key tops are 20mm x 20mm making the legends easy to read and understand.
